Name	Type	Source	License
Blockly	Library	https://developers.google.com/blockly/	Apache 2.0
Node.js	Library	https://nodejs.org/en/	Node.js
Express	Library	https://expressjs.com	MIT
cookie-parser	Library	https://github.com/expressjs/cookie-parser	MIT
bcrypt	Library	https://github.com/kelektiv/node.bcrypt.js	MIT
node-postgres	Library	https://node-postgres.com	MIT
handlebars	Library	https://handlebarsjs.com	MIT
clipboard.js	Library	https://clipboardjs.com	MIT
closure-library	Library	https://github.com/google/closure-library	Apache 2.0
jQuery	Library	https://jquery.com/	MIT
Roboto	Font	https://fonts.google.com/specimen/Roboto	Apache 2.0

2 Legal Issues

All of the above licences are all permissive free software licences, allowing the user to use the software for any purpose, to distribute it, modify it and to distribute modified versions of the software.

The MIT license gives permission to anybody obtaining a copy of the software to do whatever they want with it, free of charge, so software under this license can be used provided the licence terms and copyright notice is included.

The Apache 2.0 licence, although it is open-source, requires that a copy of the licence be distributed with any copy of the software, along with any notices of copyright, trademark and patent rights. In addition, any modification made to the original software must be accompanied with a clear indication of who modified it.

The Node.js licence, as far as its internal libraries go, is identical to the MIT licence. For its external libraries, the situation is different. OpenSSL requires in its licence that any advertising for software using OpenSSL must mention a given message. In addition, you cannot use their name to promote your software, and "OpenSSL" cannot appear in name of any software using the library. The licences for some of Node.js's other external libraries disallow using Google's name to promote any software using the library. The remaining external libraries come with the MIT licence.
